

ChatNP: The Nepal-First AI Platform

Seed Round 2026

KarkTech | "Empowering Nepal through Artificial Intelligence"

August 2026

www.karktech.tech

Nepal's Digital Divide: 16.6M Internet Users, Zero AI That Understands Them

Nepal has **85.1%** smartphone ownership and **82%** internet access. Yet, only **3.1%** of the population can program, and English proficiency varies widely.

Global AI models (ChatGPT, Gemini) fail in Nepal due to morphological complexity, cultural nuance, and contextual blindness. They lack knowledge of local geography, agriculture, and public services.

The "Token Tax": English-optimized tokenizers destroy Nepali semantic context and require significantly more compute power to process the language.

Visual: The Token Tax

ChatNP: Contextual Intelligence for Nepal

The Philosophy

ChatNP is a Generative AI Platform built specifically for Nepal — not a wrapper, but a purpose-built solution. It embodies "Contextual Intelligence": AI that understands Nepal's language, culture, and local context.

Key Differentiators

Deep Nepali NLP handles grammar, honorifics, and morphology natively. Proprietary RAG Pipelines inject localized knowledge for culturally relevant answers, ensuring ChatNP dominates local tasks.

Three High-Impact Verticals

Hybrid B2C/B2B Freemium Model

The Verticals

Agriculture (60% of workforce): Crop disease diagnosis and market prices. Education (7M students): AI tutors addressing the 46:1 student-teacher ratio. SME/Business: Accounting and document drafting.

Pricing Tiers

- 1. Free Tier:** Basic access and ad-supported.
- 2. Pro Tier (B2C):** \$5/month for advanced features.
- 3. Business Tier:** \$20/month for enterprise tools.
- 4. API Tier:** Pay-as-you-go for developers.

\$1B in IT Exports + National AI Policy = Perfect Timing

The Momentum

Nepal's IT exports surpassed \$1 billion in 2025, proving the digital economy is accelerating rapidly. Additionally, the government approved a National AI Policy (2025), creating strong regulatory tailwinds for local innovation.

The Opportunity

With 16.6 million internet users, the potential user base is substantial. While digital infrastructure is maturing, local AI solutions are lagging behind global advancements, making this the exact moment to establish a first-mover advantage.

Visual: Market Momentum

A \$294B Global AI Market with Nepal as the Beachhead

Visual: Global AI Market

The Global AI market is valued at \$294.16B (2025), projected to reach \$1,729B by 2032. The South Asia AI market is growing rapidly with 1.9 billion people, creating a massive opportunity for localized solutions.

TAM

\$294.16 Billion

Global AI market size,
growing rapidly through 2032.

SAM

~\$25 Million

Nepal AI-driven software and
services annually.

SOM

\$320,000

Year 3 target: 5% of internet
users (2% conversion).

Multi-Agent Architecture + Deep Localization = Unmatched Moat

I. Competitor Analysis

- **ChatGPT** Poor Nepali support; no local / **Gemini**: context; expensive (\$20/month).
- **GuffGPT**: Limited vertical focus; smaller team; no enterprise capability.
- **HimalayaGPT**: No commercial model; purely research-focused; no B2B offering.

II. ChatNP's Competitive Moat

- **Multi-Agent Architecture**: Routes queries to the cheapest model for cost optimization.
- **Vertical-Specific**: Tailored for Agriculture, Education, and SMEs.
- **Deep Localization**: Proprietary RAG pipelines and Nepali embeddings.
- **Pricing Advantage**: Affordable Pro tier at \$5/month vs. \$20/month.
- **Hybrid Model**: Enterprise revenue stream and API monetization.

Prototype Complete — NP1 Launch in Q3 2026

Achieved Milestones

Product Architecture Completed (Q1 2026), Website Launched at karktech.tech (Q1 2026), and Fully Functional Prototype Completed (Q2 2026). The core technology is ready for deployment.

Upcoming Milestones

NP1 Launch (Q3 2026) featuring core chat, translation, and writing. Education & Agriculture Assistants (Q4 2026). Voice AI & Image Generation (Q1 2027). AI Agents for business automation (Q2 2027).

Founder-Market Fit

Built by a Nepali, for Nepal

Visual: Ganesh Karki (Founder)

The Founder

Ganesh Karki single-handedly built the complete ChatNP prototype. He possesses deep local market intuition, having lived the problem his entire life.

Post-Funding Team

A 5-member core team: CEO & Product Lead, Lead Backend Engineer, AI/ML Engineer, Frontend Developer, and Marketing & Community Manager.

Proof of Execution

Completed prototype, detailed architecture, and comprehensive market research demonstrate strong execution capability.

"1 year of independent execution: product strategy, development, design"

Path to Profitability by Year 3 with \$2M Revenue in Year 5

Year 1

Traction

100K Total Users, 2K Paid Users. \$40K Revenue (6.0M NPR). Focus on user acquisition and product-market fit.

Year 3

Profitability

800K Total Users, 24K Paid Users. \$480K Revenue (72.9M NPR). Achieving net profitability.

Year 5

Scale

2.5M Total Users, 100K Paid Users. \$2.0M Revenue (304.0M NPR). Market leader in Nepal.

Unit Economics

Efficiency

CAC/LTV ratio of 1:12. 2.5-month payback period. Gross margin improves from 55% to 65%.

Seeking NPR 1 Crore for 10% Equity — Fueling the NP1 Launch

The Ask

We are raising NPR 1 Crore (~\$65,500 USD) for up to 10% equity. This capital fuels ~15% of Year 1 operational runway to reach profitability.

Use of Funds

- 40% AI Infra** NPR 40 Lakhs for product development and AI infrastructure.
- 30% Hiring** NPR 30 Lakhs for team expansion and core engineering.
- 20% Marketing** NPR 20 Lakhs for user acquisition and brand building.
- 10% Operations** NPR 10 Lakhs for legal, compliance, and daily operations.

Note: Funds will be deployed over the next 12-18 months to achieve the NP1 Launch and subsequent vertical expansion.

Building Nepal's AI Backbone — Join Us

"Our 10-year vision is to integrate ChatNP into every smartphone, school, and business in Nepal, powering autonomous AI systems across agriculture, healthcare, and government. We aim to expand to South Asia and make Nepal a regional leader in AI innovation."
